

## Warm Up

1. Find the slope of the line that passes through the points

(4, -9) (-2, 3)

$$\frac{y_2 - y_1}{x_2 - x_1}$$

$$\frac{3 - (-9)}{-2 - 4} = \frac{12}{-6} = -2$$

2. Write the equation for the line above if the y-intercept is -1.

$$y = mx + b$$

$$y = -2x - 1$$

# Scatterplots and Correlation

**Scatter Plots**-A graph of a set of data pairs  $(x, y)$  used to determine whether there is a relationship between the variables  $x$  and  $y$ .

Bivariate data- data from two numbers  
Correlations/Trends

**Negative correlation/trend**- In a set of data pairs  $(x, y)$  as  $x$  increases,  $y$  tends to decrease.

**Positive correlation/trend**- In a set of data pairs  $(x, y)$  as  $x$  increases,  $y$  tends to increase

**No correlation/trend**- In a set of data pairs  $(x, y)$  where there is no obvious pattern between  $x$  and  $y$ .

Decide whether the scatterplot shows positive correlation, negative correlation or no correlation

pos.

no

neg.

pos.

neg.

Tell whether a scatterplot made for each set of data would show a positive trend, negative trend, or no trend.

Rotations of a tire <sup>x</sup> and distance traveled <sup>y</sup> - positive

Test score <sup>x</sup> and shoe size <sup>-1</sup> - None

Number of pages printed and ink left in a printer cartridge - neg

Number of siblings and shirt size - none

Length of a taxi ride and amount of taxi ride - positive

Correlation Statement:

As  **$x$**  increases,  **$y$**  increases/decreases

The scatter plot below shows a relationship between hours worked and money earned. Which best describes the relationship between the variables?

## Correlation Statement:

At ABC Company, the amount of **hours worked** increases, the **money earned** increases.

This scatter plot shows the relationship between the age of a car and its value. Which best describes the relationship between the variables?

Correlation Statement:

When the Honda cars age increases the value decreases.

A history teacher asked their students how many hours of sleep they got the night before a test. Make a scatter plot out of the results

Hours Slept	8	7	7	8	6	5	7	4	9	7
Test Score	83	86	74	88	76	63	90	60	89	81

Correlation:

The more sleep you get, the better the test scores tends to be.
